

IN THE SPECIFICATION

Replace the paragraph beginning on Page 7, line 11, with the following amended paragraph:

FIGS. 1-61-7 show various steps of the method in diagrammatic cross-sectional views.

FIG. 8 shows an embodiment of the present system included as a rollable cartridge.

Following the paragraph beginning on Page 9, line 3, please add the following paragraphs:

FIG. 7 shows the flexible device of FIG. 6 including switching elements 40A, 40B, ... arranged as an array of switching elements in and on the active layer 11. An electrically conductive layer 42 is present between the active layer 11 and the functional layer 13. A pixel electrode 44 is defined in the conductive layer 42. A display pixel 48 includes a capacitor 46 with the pixel electrode 44 and another electrode 50 and a dielectric formed from the insulating layer 12 including a high-k area 52. The pixel electrode 44 is present in the functional layer 13 and the electrode 50 is defined in the active layer, with the insulating layer 12 acting as the dielectric.

FIG. 8 shows an embodiment of the flexible device 100 included in a rollable cartridge 120.
